JUNEAU HERRING UPDATE #4

The department conducted an aerial survey of Tenakee Inlet today. Survey conditions were fair with northerly winds and sunny skies. Approximately 70 sea lions and 11 whales were observed, concentrated between Kadashan and Crab Bay. Two schools of herring were observed just off of Kadashan Flats. The herring observed today were in much more concentrated groups compared to how they were spread along the edge of the flats yesterday. No herring spawn was observed.

The next aerial survey of Tenakee Inlet and Seymour Canal is planned for Sunday, April 21.

2013 Seymour Canal Survey Summary

April 15 No herring activity, 60 sea lions.
April 17 No herring activity, 68 sea lions.
April 19 No herring activity, 63 sea lions, one whale.

Juneau herring updates will be posted on the ADFG web site listed below.
